- Property/Contents Saved is calculated by subtracting the Property/Contents Loss from the Pre-Incident Value.
- Property/Contents Loss are estimates only and are intended to provide an idea of how much damage the fire caused and the replacement cost of damaged property.
- These estimates are not recognized in court as official appraisals of value.
- The Property/Contents Loss/Value fields need to be completed for every fire incident.

AUGUST 2014 SCFIRS REPORT

Top Ten Data Quality (min. 30 incidents)

FD Name	# of Incidents	SCFIRS Grade
Florence FD	210	99.514
Lugoff FD	36	99.322
Boiling Springs FD - Greenville	105	98.797
Flint Hill FD	69	98.716
Aiken Department of Public Safety	61	98.467
Pleasant Valley FD	34	98.438
Lexington County Fire Service	40	97.973
Saint John's FD	210	97.790
North Charleston FD	1,142	97.546
Hilton Head Island Fire Rescue	462	97.173

SCFIRS Grading is broken down using the following ten measures of NFIRS data quality:

- 1) Fire dollar loss** not estimated for structure fires - This measures what percent of structure fires reported had a \$0 or blank value recorded for property/contents loss. Property loss should be estimated for every fire. This measure, however, only checks for loss recorded on structure fires.
- 2) Imprecise time entry** - This measures how often your alarm, arrival, and last unit cleared times are not estimated down to the second. In the fire service, "every second counts" and must be reflected as often as possible on incident reports.
- 3) Fire control time** not recorded - Fire control time is defined as "when the fire is brought under control or the incident is stabilized and does not require additional emergency resources." Fire control time should be recorded for every fire. This measure only includes when control time was not recorded for structure fires, where the control time is most important.
- 4) Unresolved fire investigations** - This measures what percent of your fires Cause of Ignition have been left "under investigation" for longer than 180 days or are left blank. While it is true that some fire investigations will take longer than 180 days to resolve, the vast majority of fire reports stating the "cause under investigation" are never updated to reflect the findings of an investigation.
- 5 - 9) "Other" codes** - This measures what percent of Incident Type, Action Taken, Property Type, Heat Source, and Area of Origin fields are filled with a code ending in -0. Examples of these codes include '100 - Fire, other', '400 - Residential, other', '30 - Emergency medical services, other', or 'Heat from operating equipment, other'. These codes should be used only in the rarest of incidents where any of the given choices cannot fit. Avoid using these codes regularly.
- 10) Validity** - This measures what percent of your incident reports are valid by NFIRS standards with no critical errors. An invalid or incomplete incident report is deemed unusable for data analysis and incident statistics. Measures 1-9 are multiplied by this percentage and can drastically affect your SCFIRS grade.

Call us!

If you would like to know ways to increase your NFIRS data quality or to set up a 2 hour in-house NFIRS data entry training for your fire department personnel, please call 803-896-1250.

NOTES

- All data is compiled 50 days after the end of the month. For example, NFIRS data utilized for this report was received before October 20.
- Any errors or updates in this report regarding your department's data or information about your department should immediately be reported to SCFIRS.
- August data was gathered from 227 of 437, or 52% of S.C. fire departments.
- There have been 184,254 incidents reported to SCFIRS through August this year. This represents an estimated 65% of all S.C. incidents. To increase this number and improve analysis of the South Carolina fire problem, fire departments are encouraged to send NFIRS reports on a consistent, monthly basis.
